

KENNETH JHUN N. BALINO

Cebu, Philippines | kennbalino@gmail.com | [portfolio](#) | [LinkendIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Junior full-stack developer with hands-on experience building real-world internal systems using Laravel and React. Comfortable working across backend logic, APIs, and frontend interfaces. Seeking a structured, collaborative team with clear processes and healthy work life balance.

EXPERIENCE

Junior Web Developer TinkerPro Technologies

June 2025 – Present, Lapu-Lapu City, Cebu Philippines

- Contributing to the development of a multi-branch Point of Sale (POS) system used for daily operations
- Working on management and backend modules alongside a senior developer
- Implementing backend features using Laravel, including authentication, role-based access, and data management
- Developing frontend interfaces using React (TypeScript) with Inertia.js
- Designing and integrating RESTful APIs between frontend and backend
- Participating in feature planning, implementation, testing, and bug fixing
- Containerize the web application using Docker, creating consistent development and deployment environments
- Configure Dockerfiles and Docker Compose for local development, ensuring environment parity across the team

IT Support & WordPress Developer BrightWayPH

Jan 2025 – June 2025, Cagayan De Oro, Philippines

- Designed and maintained company website using WordPress
- Managed website performance, security, and regular updates
- Provided technical support for hardware, software, and basic networking issues

PROJECTS

- Job Request System: Built a scalable Django/React system with real-time updates, role-based access, and intuitive UI, improving workflow efficiency by 40% and reducing request resolution time by 60%.
- Employee Survey Website: Developed web-based feedback and reporting tool, achieving a 75% employee response rate and identifying key areas that led to a 30% improvement in team satisfaction.
- Warehouse INVS: A fast, efficient, and intuitive warehouse inventory system built to streamline stock management. It allows precise tracking of tools, office supplies, and equipment, enhanced with built-in notifications, QR support, and real-time issuance monitoring.

SKILLS

Frontend

- React, NextJS, Tailwind, Bootstrap, Typescript, JavaScript

Backend

- Laravel and Django

Database

- PostgreSQL and mySQL

Tools

- Git, GitHub, VSCODE, Docker

Design & CMS

- Figma, WordPress, Elementor

EDUCATION

Bachelor of Science in Information Technology

University of Science and Technology of Southern Philippines | 2025
