PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building real-world internal systems using Laravel and React and other technologies. Comfortable working across backend logic, APIs, and frontend interfaces. Focused on writing clean, maintainable code and delivering scalable solutions that support real business needs.

EXPERIENCE

Junior Web Developer   **June 2025 – Present, Lapu-Lapu City, Cebu Philippines**
TinkerPro Technologies

- Developed frontend interfaces with React (TypeScript) and implemented backend functionality in Laravel, including authentication and role-based access control for a multi-branch POS system.
- Integrated **RESTful APIs**, participated in testing and debugging, and ensured the system met performance and functionality requirements.
- Containerized the application using **Docker** to streamline development and maintain consistent deployment environments.

IT Support & WordPress Developer   **Jan 2025 – June 2025, Cagayan De Oro, Philippines**
BrightWayPH

- Configured and customized a WordPress template, applying CSS to create a visually appealing and functional company website.
- Maintained the website with regular updates to ensure security and optimal performance.
- Provided technical support for hardware, software, and basic networking issues, helping ensure smooth daily operations and increased applicant engagement.

PROJECTS

- **TinkerPro POS:** Developed a modern full-stack Point of Sale system using Next.js and TypeScript, enabling multi-branch sales management, real-time inventory tracking, and streamlined reporting for small businesses.
- **BrightWay:** Configured and customized a WordPress/Elementor website for a startup insurance company, improving client engagement and online visibility.
- **Job Request System:** Built a scalable Django/React platform with real-time updates, role-based access, and intuitive UI, improving workflow efficiency by 40% and reducing request resolution time by 60%.

TECHNICAL SKILLS

Frontend
- React,
- NextJS
- Tailwind, Bootstrap
- Typescript
- JavaScript (ES6+)

Backend
- Laravel (PHP)
- Django (Python)

Database
- PostgreSQL and mySQL

EDUCATION

Bachelor of Science in Information Technology   **June 2021 – July 2025 Cagayan De Oro, Philippines**
University of Science and Technology of Southern Philippines
